

Product Technical Data Sheet: Partex Masonry Mounts

Description

Our high quality masonry mounts are made from black Nylon 6.6 and are designed to secure cable ties directly to holes drilled in solid surfaces.

Specifications

| | |
|--------------------------|------------------|
| Material: | Black Nylon 6.6* |
| Temperature range: | -40°C to +85°C |
| Maximum cable tie width: | 9.0mm |
| Fixing hole depth: | 38.0mm |

Available in two sizes

| | |
|------------|-----------------------------------|
| MM6 | to suit a 6.0mm pre-drilled hole. |
| MM7 | to suit a 7.0mm pre-drilled hole. |

Supplied in bags of 100.

*Nylon 6.6 is a tough, relatively strong material, which possesses good fatigue resistance, low coefficient of friction, good thermal stability and low flammability. It is noted for its resistance to chemicals, especially hydrocarbons and greases. Partex masonry mounts are manufactured from black material which is resistant to UV radiation, and are therefore suitable for exposure to sunlight and exterior weather conditions.
