

CRIMPING TOOL : CT150

Description.

Hand held manual operated crimping tool with rotational wheels to accommodate hexagonal die sets from 25 to 150mm/sq . For crimping of copper tube terminals 25 to 150mm/sq.

Features.

2 Multiple die aperture rotating wheels built into head for easy die selection.

Long handles to minimize crimping effort.

Tubular steel handles to reduce weight.

Hexagonal die form.

Soft PVC moulded handles for optimum grip.

Application.

For crimping of copper tube terminals from 25mm to 150mm/sq.

Meet the compression ratio requirements of BSEN61238-1:2003.

Material specification.

Die & head material : Steel grade SCM440.

Handle material : Tubular Steel

Handle treatment finish :Pyrocondensation cannula.

Handle grips : Soft PVC.

Tool weight : 4.0kgs.
