

EPL Panel labels

- Flexible, soft sign with high tack adhesive.
- UV resistant.
- Resistant to scratching and abrasion.
- Easier, faster, and more cost-effective than engraved signs

BENEFITS

EPL (Enhanced Panel Label) are labels specifically designed as an alternative to engraved signs for the identification of electrical components, electrical cabinets, push buttons and patch panels.

The labels are flexible, with high tack adhesive that ensures secure adhesion even on rough or uneven surfaces. They offer excellent resistance against scratching, abrasion, and wear. They are also resistant to alcohols, lubricants, and oils.

The labels are printed using MK10-series thermal transfer printers and designed in the Promark Creator software.

TECHNICAL INFORMATION

Material

Polyester foil and polyethylene foam
Thickness: 0.6mm.

Adhesive

Acrylate adhesive.

Temperature range

Operating range: -30°C to +135°C
Application range: +5°C to +40°C

Resistance properties

UV resistance according to 4892-2 (700 h)
Excellent resistance to isopropyl alcohol, oil and water.

Colours

Standard: Yellow (4), silver (8), white (9). Other colours available on request.

Expiry date and storage

Storage stability: +15°C to +22°C
and 55% relative humidity (RH).

Printing

Printable with recommended thermal transfer printers from the MK10-series (e.g. EOS, SQUIX). Use Promark Creator software for design and production management.

Recommended ribbons

MK10-RB-PX6
