

Dear supplier / customer,

According to the EU directive 1907/2006/EC concerning the Registration, Evaluation and Authorisation of Chemicals it is our duty to communicate down the supply chain, (Article 33) when a material contains more than 0.1% of a substance listed on the Candidate list as defined by Article 59 of the regulations. The European Chemicals Agency has published the initial candidate list. This list will be subject to periodic amendment.

Partex current state of knowledge

As to this date 2021-01-25, Partex products does not contain more than 0.1% of a substance listed on the Candidate list as defined by Article 59 of the regulations.

Partex is constantly in close contact with its suppliers in order to be informed about their latest REACH-status. We will update this statement after feedback of our suppliers if status changes.

Best regards,

Henrik Gustavsson
Quality and Environmental Manager
